

Vaibhav Agarwal

Software Development Engineer II @ Solfin & builder of Hortiprise

iamvaibhav.agarwal@gmail.com · github.com/vaibhava17 · www.linkedin.com/in/vaibhava17 · Gurugram / Delhi NCR, India

Software Development Engineer with hands-on experience building production SaaS platforms, autonomous AI workflows, and developer tooling. Creator of Hortiprise (a complete agricultural nursery SaaS with AI OCR invoice digitization and WhatsApp workflows), DiffCommit AI (published VS Code extension across 9 AI providers), Syntra (local-first RAG with git-diff incremental indexing), and deterministic AI pipelines.

■ EXPERIENCE

Solfin Software Development Engineer II

Jan 2025 — Present · Gurugram, India

- Architected and owned the frontend for Commercial & Industrial (CNI) and Supply Chain Finance (SCF) solar loan journeys, streamlining end-to-end workflows from application through credit underwriting to disbursement.
- Engineered an AI document intelligence service with a structured RAG pipeline for bill extraction.
- Optimized LLM inference and document pipelines while supporting 8,000–10,000 weekly calls at under 1% failure rate.
- Built a unified, multi-provider LLM service layer routing across Google Gemini, AWS Bedrock, and OpenAI for internal chatbots and business services.

bill extraction accuracy: **70%** -> **90%**

avg. LLM response latency: **20s** -> **7s**

Hortiprise Lead Engineer (Side Project)

2025 — Present · Gurugram, India

- Founded and architected Hortiprise, a nursery-management SaaS digitizing end-to-end horticulture operations: plant inventory, sowing batches, germination tracking, quotations, billing, sales, and dispatch.
- Engineered a multimodal document pipeline (Google Cloud Vision + Tesseract + LLMs) to extract structured data from messy real-world Indian invoices.
- Built RAG-powered nursery intelligence tools for plant health analysis, document analysis, and demand forecasting.
- Integrated interactive WhatsApp-based ordering and automated dispatch confirmations, no dedicated app required.

TalentXO Software Development Engineer I

Sept 2023 — Dec 2024 · Remote / Bangalore, India

- Developed and maintained candidate search and indexing infrastructure on Apache Solr, indexing high-volume candidate profiles and recruitment metadata to power complex recruiter filtering.
- Architected a recruiter lead-generation and attribution engine with token-based link tracking, connecting inbound applications back to originating recruiters as actionable leads.
- Optimized background processing and recurring overnight data pipelines generating recruiter analytics, improving throughput and reliability.
- Delivered end-to-end full-stack features, database schema migrations, and rapid production bug triaging.

Guni SMS Frontend & Mobile Engineer

Dec 2021 — Sept 2023 · Remote / Sydney, Australia

- Built and maintained the React web platform for an Australian enterprise SMS gateway — campaign creation, messaging broadcasts, and contact lifecycle management.
- Spearheaded the core dashboard modernization from V1 to V2, redesigning UI architecture into reusable React components and pages.
- Engineered responsive, mobile-optimized interfaces across the messaging suite.
- Collaborated with backend engineers on automated two-way messaging workflows triggered by real-time replies and scheduled campaigns.

SKILLS

Category	Skills
AI, LLMs & agentic systems	Multi-provider LLM orchestration, Structured RAG & document intelligence, Vector databases (Qdrant), Multimodal vision & OCR, Autonomous AI agents & workflows, Deterministic AI pipelines, Conversational AI & internal chatbots, Prompt engineering & structured outputs, Local LLMs & offline inference
Backend engineering & data systems	Python (FastAPI, Pydantic v2, Pytest), TypeScript / Node.js, Relational databases (PostgreSQL, MySQL), Search & indexing (Apache Solr), Prisma ORM & data modeling, Document databases (MongoDB), In-memory caching & queues (Redis), Resource-aware schedulers & background ETL, Automated testing (Pytest, Jest)
Frontend & UI architecture	Next.js (App Router, server components), React & component systems, TypeScript, Tailwind CSS & modern UI, State management & optimistic UI, Mobile-responsive web design, Framer Motion
Cloud, DevOps & production monitoring	Docker & containerization, Production infrastructure monitoring, Cloud platforms (AWS Bedrock, GCP), Linux administration & shell scripting, GitHub Actions CI/CD, Third-party messaging APIs
Mobile & developer tooling	React Native / Expo, VS Code extension API & SecretStorage, Git internals & diffs, Flutter & Dart, Appium UI automation

EDUCATION

School	Degree	Period	Grade
IIT Mandi	Minor in CSE, Computer Science & Engineering	2024 — 2026	7.0 CGPA
Shri Siddhi Vinayak Group of Institutions, Bareilly	B.Tech, Computer Science & Engineering	2019 — 2023	8.2 CGPA

CERTIFICATIONS

Title	Issuer	Year
Project Engineer Internship	Wipro Ltd.	2022
Node.js Developer Course	Udemy	2022
Django Using Python	CETPA Infotech	2020
